DRC Systems India Limited to acquire majority stake in Inexture Solutions Limited to expand global reach and strengthen technology capabilities

Gandhinagar, India - June 17, 2025 - DRC Systems India Limited (BSE: 543268 | NSE: DRCSYSTEMS), ("DRC Systems" "the company") a leading provider of information technology and software consultancy services, today announced to acquire equity stake in Inexture Solutions Limited ("Inexture") not exceeding 50.10%, a move designed to accelerate the company's global growth and strengthen its delivery capabilities .

The proposed acquisition - valued at up to INR 1 crore - is subject to regulatory and statutory approvals. Upon completion, Inexture will operate as a subsidiary of DRC Systems, further enhancing the company's ability to serve a broader client base across geographies and industries.

Ahmedabad-based Inexture Solutions Limited is a fast-growing IT services and consultancy company that offers full-stack software development, consulting, and maintenance solutions. With proven expertise across technologies such as Python, Java, Full Stack, Liferay, Spring Boot, and Django. Inexture delivers customized digital solutions that drive operational efficiency and business transformation for its global clients.

"This acquisition not only fortifies our technological capabilities but also significantly enhances our client accessibility and acquisition potential." said **Mr. Hiten Barchha, Managing Director of DRC Systems India Limited**. "This strategic move will bolster our sales efforts in new geographical markets."

DRC Systems already has a well-established strong presence in the Middle East, European regions and USA. The acquisition of Inexture, which serves hundreds of clients globally, is expected to further penetrate the USA market while also expanding into two new territories: Belgium and Australia.

The Australian software and IT services market, in particular, presents significant opportunity. Fuelled by accelerating digital transformation, Australia's IT services sector is expected to reach USD 80 billion by 2033, growing at a CAGR of 10.18% (2025 - 2033). Additionally, the software industries segment is projected to generate revenues of USD 40.26 billion by 2030, with the IT consulting and implementation market forecasted to reach USD 1.59 billion. *(IMARC Group, Statista)*

This acquisition is aligned with the company's long-term vision of becoming a global technology solutions powerhouse - delivering next-generation IT capabilities that help clients across sectors transform, scale, and thrive in the digital age.
